

Statement of Environmental Values

It is a Project Angel Heart core value to use and promote practices which reduce or minimize harm to the environment. Our staff is committed to:

- minimizing pollution to air, land, and water
- making continuous improvements, as our program allows, in areas such as energy efficiency, waste reduction, resource conservation, sustainable business management, and the establishment and monitoring of performance metrics
- complying with all applicable environmental regulations and requirements
- continuously working towards the goals outlined in our Environmental Management System (EMS)

This information shall be communicated with Project Angel Heart staff, board, volunteers, and those working on the premises under the direction of Project Angel Heart, as applicable, to ensure understanding and compliance as it applies to this statement. Each Project Angel Heart staff member is accountable to this statement and for reporting any environmental concerns to the Administrative Coordinator or Senior Vice President.

Project Angel Heart will communicate with the public, on an annual basis, environmental performance related information. We are committed to providing a healthy environment for our staff, volunteers, clients, and the local community in which we operate and serve.
